The use of CuVerro is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination. BACTERICIDAL COPPER SURFACES

Now as an added protection in the ongoing battle with bacteria, Pedigo offers side rails made from **CuVerro® bactericidal copper alloy**.

Copper is an intrinsic bactericidal element and **CuVerro®** is the **ONLY** solid touch surface metal registered by the EPA to continuously kill bacteria<sup>1</sup> that cause infections and pose a risk to human health. Lab tests show more than 99.9% of bacteria<sup>1</sup> associated with disease and infection, including MRSA<sup>1</sup>, are killed within two hours when in contact with copper. Bacteria will continue to be killed 24 hours a day, week after week, between regular cleanings.
