Proudly Made in the USA

universal procedure stretcher

STANDARD FEATURES

- 500 lbs. weight capacity
- True Direction Steering (TDS)
- Side rails - full length, single release
- Center column design with precision ball bearings
- Single Trendelenburg assist cylinder (positive/negative - pneumatic)
- Pneumatic assist Fowler 400 N (90#) force
- Dual side-mounted hydraulic foot pedals
- Brake & Steer activated foot pedals
- Four corner IV pole receptacles
- Four restraint strap positions
- High impact corner bumpers
- 8” easy mobility casters
- Latex-free

The 5400 Series universal transport stretcher is versatile, yet economical. It’s the right stretcher for ED, OR, PACU, or any department where cost, efficiency and quality are required.

**RAIL SYSTEM:**
Easy to wipe clean and disinfect, full length tuck-away side rails allow for easier patient transfer by creating a zero transfer gap. Rails feature a release latch centrally located on either side of the litter top under the patient surface.

**PNEUMATIC ASSIST FOWLER:**
Provides additional assistance for the safe and easy raising and lowering of the patient.

**HYDRAULIC HEIGHT ADJUSTMENT FOOT PEDALS:**
Hydraulic Foot Pedals are located on each side of the stretcher within the patient care zone. Color-coded pedals and function graphics are quickly and easily understood.

**CENTER COLUMN SUPPORT:**
Sturdy steel column with single hydraulic lift cylinder design uses sixteen precision ball-bearings to smoothly raise and lower the patient.

**TRUE DIRECTION STEERING (TDS)**
For improved stretcher control, engage the True Direction Steering system. The steer caster located at the patient’s right foot end of the stretcher will lock once the steering pedal is engaged.

**FOLD DOWN IV POLE**
Available as an option, the fold down IV pole tucks out of the way when not needed and remains attached to the stretcher when in use.

**IV CADDY**
Quickly and easily secure an IV pole to a stretcher using Pedigo’s IV Caddy. Allows one caregiver to manage the safe transport of the patient, stretcher and IV equipment. Stores under litter top when not in use.

**ZERO TRANSFER GAP**
Tuck-away side rails allow the caregiver to position the 5400 Series Stretchers flush with the bed for a zero transfer gap ensuring easier patient transfer. No expensive or cumbersome transfer devices are required.

Copper is an intrinsic bactericidal element and CuVerro® is the ONLY solid touch surface metal registered by the EPA to continuously kill bacteria1 that cause infections and pose a risk to human health. Lab tests show more than 99.9% of bacteria associated with disease and infection, including MRSA1, are killed within two hours when in contact with copper. Bacteria will continue to be killed 24 hours a day, week after week, between regular cleanings.

1 CuVerro alloys have proven effectiveness on MRSA (Methicillin-Resistant Staphylococcus aureus), S. aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, and Escherichia coli 0157:H7 and VRE (Vancomycin-Resistant Enterococcus). CuVerro is a registered trademark of GBC Metals LLC, d/b/a Olin Brass.
